BROOKLYN CARS RUN

President Rossiter Tries to Address the Strikers.

DEVERY SAYS TROUBLE IS OVER. Fourteen Hundred Policemen Fron Manhattan on Duty-The Strikers

Claim Their Ranks Are Being Constantly Assumented. NEW YORK, July 18.-Conditions have changed but little in the struggle between the Brooklyn Rapid Transli company and its employees. Back sidmaking claims that seem somewhat ride of the truth.

To all appearances the big corporation is operating the cars over most of its lines on a schedule which meets the demands of traffic. The traffic, however, is not as large as though no strike had been declared, and the public seems shy of pat-rontsing the cars while there are differ ences between the employer and em ployee.

Each side professes confidence in its

ability to win. President Rossiter of the Rapid Transit company declares that so far as the company is concerned the strike is all over. He says the attitude of the men who declined to continue in the company's service no longer give him any concern.
On the side of the strikers the declara-

tion is made that the men are standing firm and that the ranks of the protes tants are being angmented hourly. The moving spirits in the strike point out that on the second day of the big labor revolt of 1895 the situation was very much as it was yesterday and yet the men remained out for weeks and kep the rallroad corporation crippled. The men assert that they are not in the least disheartened. All lines are running many less cars than usual, they insist, despite my company reports to the contrary.

President Rossiter sate yesterday after noon went out to the Flatbush harns to address the men. There was a violent demonstration in the ball of the strikers

while Mr. Rossiter was speaking, but he never qualled. He was struck with an apple core as he left the place. A riot marked his departure from the meeting Fourteen hundred policemen from the borough of Manhattan are now on duty

A telephone message was received by Van Alen from Goudoff, saying that he was coming down to "do him up." An hour later Gondoff entered the saloon, and Van Alen pushed him out on the sidewalk. Both then drew revolvers and commenced firing through the glass door, which was shivered to pieces. When the shooting was over, Gondon was shot through the groin and in the small of the back. TRUTH ABOUT CUBA. Her Wonderful Development

and the second of the second second

Not Generally Realized.

AMERICAN VISITORS CHIEF CULPRITS

can People as to the "True State

They Assume to Inform the Ameriof the Island," Being Them-

selves Ignorant. HAVANA, July 18,-General Ludlow nilitary governor of Havana, thinks that the American press and people scarcely realize the wonderful development which the last six months have wrought in Cuba. During the progress of the in-surrection an important section of the American press was in the habit of describing the average Cuban as very little short of an angel. Then came the reac-tion, which went even to the extent in non, which went even to the extent in some comic journals of describing him as an intermed savage. Those extremes are equally far from the truth, and General Ludlow believes that the latter description is every whit as injurious to the real tion is every with an injurious to the real interests of Cuba as was the former. Another thing he criticises is the dis-position of some American papers to call the widest attention to the foolish actions of nonrepresentative Cubana and t those who wish to bring order out of chaos and who really are working ef-fectively in that direction. He feels that it is a serious mistake not to show proper discrimination in commenting upon affairs pere and has satisfied him-

self that the principal culprits are American visitors to Cuba, who remain here only a few days and on returning to the United States write to the papers regarding the 'true state of the island," when they have had practically no opportunity of getting at the facts by personal observation. In his judgment it is very unreasonable and unfair, merely because a local mayor, for instance, issues at order which, while applicable here, may possibly seem abourd in the United States, that the official should be held up to popular ridicule in the United States and ultimately here, without regard to much excellent work which he has in all probability done. Yesterday the Spaniards had their first

opportunity to register an intention to retain Spanish citizenship. According to the treaty of Paris they have until April next to decide. The majority seem to be puszled as to what course to pursus. A proper remedy after his last dinner would, in all probability, have made impossible this untimely death.
